MediaWiki

SMW  
Semantic MediaWiki

We're in the  
*Content Services Platform*  
business  
together!

And our customers (organizations,  
companies) like that.  
But they want it 'out-of-the-box'.

# What does 'out-of-the-box' mean to those organizations?

- Extensions to choose from
- That are of high quality
- That integrate well
- That provide a solid basis for flexible, custom solutions

# What should be in the box?

- MediaWiki 1.35  
*with new Parsoid*
- Semantic MediaWiki, Cargo (Wikibase?)  
*With integrated (Elastic)search*
- PageForms, WS Form, TinyMCE, Widgets, (Vue.js?)
- Utilities  
*such as Admin Links, custom parser functions*
- Policy based authorization
- Development and deployment tools  
*Git-based deployment  
Page Sync, Page Exchange*
- Existing and new extensions for critical CSP capabilities  
*Workflow and Process  
Collaboration  
Information Governance*

**And more!**

# Good news for all of us!

- Open source alternative to SharePoint, Confluence and alike
- Basis for product-market combinations
- From consultants to business solutions providers
- Contributors  
Software  
Content

What should we do  
as an (Enterprise-Semantic-MediaWiki)  
community?

# What should we do as an (Enterprise-Semantic-MediaWiki) community?

- Reach out to all involved parties for strategy and plan
- Create shared understanding
- Fill the box
- Create market position and recognizability
- Create 'ability to execute'

Market position and recognizability

# MediaWiki Content Services Platform

# Ability to execute

## Skills

- Consulting
- Solution Architect
- Design
- Developer

## Material

- Documentation
- Tutorials
- Training

## Scalability

- Automation
- Focus
- Growth

As a community let's embrace the  
MediaWiki based Open Source  
Content Services Platform!
